

Billing With All The Facts Helps You Take Control Of Your Fleet

Dedicated Exclusively To The Commercial Customer

At Alexis Oil, we are committed to helping commercial customers keep business moving right along; that's why the billing system we use, is as useful and efficient as our fueling stations.

Ready When You Are, To Start Work

Whatever size and type of vehicles your company operates, Alexis Oil is ready to keep them rolling. Conveniently located near commercial areas and on major arterials, our fully automated stations carry gas and diesel fuel - and are open 24/7/365!

Billing That Puts You In Control

Our billing system restricts purchase authorizations in ways that help you control and monitor fuel costs. Every card issued identifies the vehicle and driver, and permits pump access only when used with a unique security code. Fueling transaction data is collected whenever the card is inserted into our fueling site card reader, and the information is sent to your company each billing period. The printout allows close tracking of vehicle use and fuel consumption, and provides a great cost control tool.
